EDUCATION

Bachelor of Science (B.Sc.) in Artificial Intelligence 2024 – Present
Institut de Formation et de Recherche en Informatique (IFRI) – Université d'Abomey-Calavi, Benin

- Currently in 2nd year (Level 200).
- **Focus:** Machine Learning, Search Algorithms, Web Architecture & AIoT.

High School Diploma (Scientific Series – Série D) Graduated in 2024
Collège Catholique Pierre Joseph de Clorivière, Benin

- Obtained with Honors. Specialization in Mathematics, Physics, and Life and Earth Sciences.

PROJECTS

Artificial Intelligence & Data Science
Music Recommendation Engine (Desktop Application) 2026

- **Deep Learning & Embeddings:** Extracted audio feature vectors using MusiCNN and CNN14 architectures.
- **Architecture:** Optimized models to ONNX format for efficient local inference. Managed user profiles (likes) via NumPy arrays and handled cross-platform VLC media player control using the *subprocess* module.

Open Source Contribution – ifri-mini-ml-lib 2026

- Contributed to the development of an internal university Python library dedicated to baseline implementations of core Machine Learning algorithms for educational use and understanding model architectures.

Web & Software Development

Multi-Channel Two-Factor Authentication (2FA) System – Laravel 2025

- Designed an advanced security module providing web login validation coupled with one-time verification codes sent via **Email** or **WhatsApp**, based on user preference.

Ride-Sharing Web Application – Django 2025

- Developed a full-stack web platform connecting drivers and passengers for optimized carpooling.

Centralized Medical Information System – Java (Console) Academic Project

- Implemented core business logic and data structures to manage patient medical records, histories, and logs in a CLI environment.

Mini-projects & Algorithmics 2024 – 2025

- **Compression Algorithm:** Implemented a Python-based file optimization and compression script.
- **BMI Calculator:** Developed a responsive web application using native HTML5, CSS3, and JavaScript.

CERTIFICATIONS

DataCamp Track: Associate Data Scientist in Python (In Progress)

- Certification: *Data Manipulation with pandas*
- Certification: *Intermediate Python*
- Certification: *Introduction to Python*
- Certification: *Understanding Artificial Intelligence*

OpenClassrooms

- Certifications: *Learn to Program with JavaScript* • *Discover How Algorithms Work*
- Certifications: *Manage Code with Git and GitHub* • *Learn the Basics of Python* • *Understanding the Web*

Codingame

- Certification: *Python 3 Proficiency*

Sololearn

- Certification: *Introduction to SQL*
- Certification: *Intermediate SQL*

AI CONFERENCES & COMMUNITIES

Benin Workshop on Artificial Intelligence (BWAi)

2025 - Participant

- Attended workshops and keynotes focused on Machine Learning, Deep Learning, and AI applications tailored to the Beninese ecosystem.
- Engaged in networking sessions with regional researchers, students, and tech industry professionals.

IndabaX Benin

2025 - Participant

- Participated in the pan-African community network for research and innovation in Artificial Intelligence.
- Attended technical tracks, workshops, and lectures centered on Deep Learning and Data Science trends.

SKILLS & LANGUAGES

Technical Skills (Pro Skills)

- **Frameworks:** Laravel (PHP), Django (Python)
- **AI & Data:** Pandas, NumPy, Scikit-learn, ONNX
- **Languages & Tools:** SQL, JavaScript, HTML/CSS, Git, Java

Soft Skills

- Communication, Teamwork, Leadership, Creativity

Languages

- **French:** Native
- **English:** Intermediate (B1) – Proficient in technical reading and writing
